PROFESSIONAL SUMMARY

Mid-Level Frontend Developer with 5+ years of experience specializing in the React.js, Next.js, and TypeScript ecosystem. Proven ability to build scalable, high-performance SaaS applications with a strong focus on UX/UI, SEO, and Core Web Vitals. Expert in robust RESTful API integrations, complex state management, and modern styling architectures (Tailwind CSS). Actively leveraging AI-assisted development workflows to maximize engineering productivity. Adept at delivering end-to-end solutions for international markets, integrating global payment gateways, and implementing multi-language support.

TECHNICAL SKILLS

Frontend Core: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3.

State & Data Management: Redux, Context API, Zustand, TanStack Query.

Styling & UI: Tailwind CSS v4, Styled Components, UI/UX Implementation.

Backend & Databases: Node.js, Fastify, Prisma ORM, Drizzle ORM, PostgreSQL, MongoDB, Firebase.

Tools & DevOps: Git/GitHub, Docker, Vercel, Stripe, Chrome Extension API, AI Coding Assistants.

Auth & Practices: NextAuth/Auth.js, Better-Auth, Clean Code, SEO, Core Web Vitals optimization.

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Freelance)

Mar 2016 – Present

Remote

- Architected and implemented end-to-end frontend solutions and full-stack integrations for diverse SaaS projects and web portals.
- Engineered a court scheduling SaaS featuring complex time-slot logic, secure authentication, and global payment processing using Stripe.
- Implemented robust authentication and payment flows utilizing NextAuth, Better-Auth, and Stripe, directly translating client requirements into scalable technical solutions.

Frontend Developer

Mar 2022 – Oct 2024

Softgraf Informática

- Developed responsive and cross-browser compatible user interfaces for complex management systems.
- Spearheaded the refactoring of legacy codebases to modern React.js, significantly elevating application maintainability and rendering performance.
- Optimized REST API consumption to dramatically reduce load times and participated actively in code reviews to enforce Clean Code practices.

SELECTED PROJECTS

me.bio.br (Linktree-style Profile Manager)

<https://me.bio.br>

- Created a modular, high-performance profile management platform utilizing **Next.js**, **Tailwind CSS**, **PostgreSQL**, and **NextAuth**.
- Focused heavily on UX and Core Web Vitals, implementing multi-language support (i18n) and managing complex database schemas.

Dr. Droid Cleaner (SaaS)

<https://drdroidclean.com>

- Engineered a full-stack tool utilizing **Next.js, Tailwind CSS, and PostgreSQL** to scan and optimize Android devices via ADB commands.
- Architected a secure payment architecture with **Stripe** and implemented authentication using NextAuth.

video.tv.br (Video Streaming Manager)

<https://video.tv.br>

- Developed a SaaS platform and Chrome extension using **React.js, Next.js, and Browser APIs** to organize and share private YouTube playlists via the YouTube API.

Carangola Digital (Real Estate & Commerce Portal)

<https://carangoladigital.com.br>

- Built a digital listing platform utilizing **Next.js, Tailwind CSS, and Firebase**, embedding advanced business logic for real estate and local commerce.
- Optimized Core Web Vitals and SEO to ensure maximum visibility and rapid indexing by search engines.

EDUCATION & LANGUAGES

Bootcamp Ignite (ReactJS, React Native, NodeJS) – Rocketseat

High School Diploma

Languages: Portuguese (Native), English (Technical / Working Proficiency)
